

Solving the Caregiver Crisis: A \$1 Trillion Humanoid Healthcare Opportunity

"I don't need it to look like Ryan Gosling - I need a Robot that doesn't judge me when I puke, and cleans up."

— Cancer Survivor

Our Mission: We are building the definitive medical-grade AI & data platform that transforms newly affordable humanoid robots (like the \$5,900 Unitree R1, shown bellow) into indispensable in-home care companions.

THE PROBLEM: A System at its Breaking Point

Caregiver Shortage: Our aging population faces a critical shortage of available care, placing an unsustainable burden on both professional and family caregivers

Unsustainable Costs: Current healthcare models of support are financially unsustainable

Personalized Care Gap: Existing solutions lack 24/7 tailored treatment

OUR SOLUTION: A Healthcare OS for Humanoids

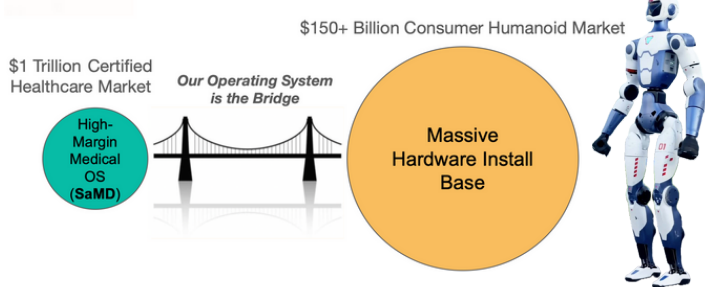

The AI Brain: Manages medical schedules, monitors vitals, provides emotional support, and assists with key Activities of Daily Living (ADLs) to maintain patient independence, and a clean and safe home environment

The Clinical Bridge: AI-Orchestrated & EHR-Integrated: Orchestrates care by linking the physical robot with a conversational AI Agent, enabling a seamless transition to physician telepresence, all integrated with EHR

From Adherence to Prevention: Improves treatment adherence and automated wellness protocols. Eventually transforms to Preventative Care

OUR GO-TO-MARKET STRATEGY

Hardware Commoditized: Unitree R1 groundbreaking \$5,900 price point unlocks the \$1 Trillion Healthcare Market

Source: Goldman Sachs Research (2035 'blue-sky' forecast); composite healthcare market

OUR UNFAIR ADVANTAGE

Lived Experience: Founded by Andy Squire, two-time cancer survivor

Software-first Strategy: Hardware-agnostic platform avoids R&D costs, enables partnerships with any manufacturer (e.g., Unitree, NVIDIA etc.)

THE TRIPLE WIN VALUE PROPOSITION

For Patients & Caregivers:

- Dignity & Independence
- Improved Quality of Life
- Personalized support

For Robotics Manufacturers:

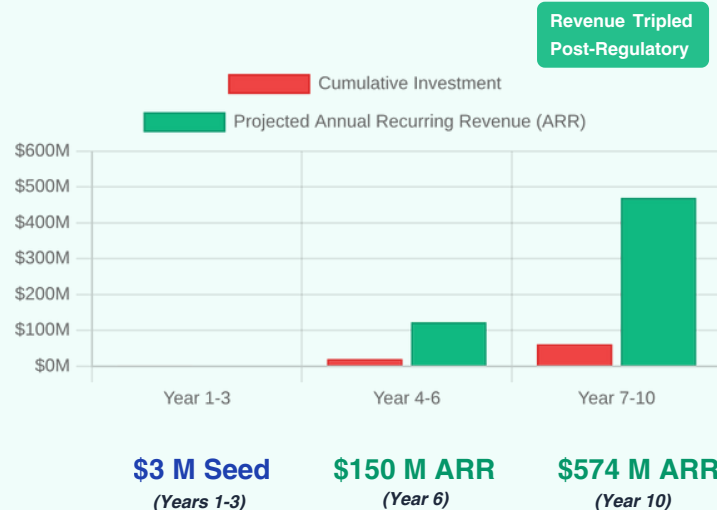

- First-mover advantage
- Recurring revenue streams
- Market expansion

For Healthcare System:

- Preventative care
- Reduced costs, Sustainability
- Less admin burden

PROJECTED REVENUE & CAPITAL PLAN

THE ASK

We are seeking founding partners and strategic investment to co-create the future of patient care.

Next Steps

- **Seed Funding:** To achieve SaMD regulatory milestones & begin platform integration
- **Strategic Partnerships:** To establish our OS as the official healthcare solution for leading Robotics Hardware manufacturers
